

Khaki Travel Operating System

Operations Cockpit, CRM, ERP, and Omnichannel Dispatch Engine

Confidential Briefing

Audience: Bharat, Priya, Kayvan & Leadership

Date: October 2026 | Version 1.0 Live

Executive Purpose: Khaki Tours has created an iconic Mumbai cultural brand across 81 heritage walks, world-first #UrbanSafari open jeeps, and 36 Ambassador historians. As booking volume surges, operating on Google Sheets, manual UPI typing, and late-night WhatsApp messaging caps growth and burns out staff. **Khaki Travel OS eliminates this friction**, automating repetitive workflows while preserving the warm, scholarly human touch that defines Khaki Tours.

1. The Four Revenue Verticals in Khaki Travel OS

Rather than a generic off-the-shelf software, Khaki OS is tailored precisely to your four business verticals:

VERTICAL	PRICING TIER	CORE OPERATIONAL BOTTLENECK	KHAKI OS AUTOMATED SOLUTION
Tier 1: Scheduled Walks	₹699 – ₹1,199 / pax	Staff manually verifying seat counts, messaging UPI links, and texting Google Maps pins.	100% Automated Fast-Path: Bot verifies real-time inventory, issues dynamic UPI link, locks seat upon payment, and fires ticket + map pin. Zero staff touchpoint.
Tier 2: Private & Open Jeeps	₹4,999 – ₹14,500 / group	High weekend demand; risk of double-booking jeeps or guides; holding seats unpaid.	Hold-vs-Pay Decision Engine: Parallel resource broadcast locks jeep (Ramesh Gurav) + guide simultaneously with a 30-min expiring payment link.
Tier 3: International Expeditions	₹1.5L – ₹3.0L+ / pax	Forex volatility risk between Indian traveler collection and foreign land supplier payment.	Dynamic FX Volatility Engine: 3.50% automated buffer on USD/EUR quotes, milestone tracking (25%/35%/40%), and 30-day spot settlement audit.
Tier 4: Corporate B2B Retreats	Custom Quotes (Godrej, Mahindra)	Manual proposal typing taking 2–3 days; complex GST SAC compliance and client ITC requirements.	15-Minute SLA & Proposal Builder: Real-time intent detection, 18% GST (SAC 998554), cohort guide division (max 20 pax/guide), Net-15 terms.

2. External Partner Reality: 100% Zero-Login for Guides & Vendors

A core architectural foundation of Khaki Travel OS is that **guides and vendors will NEVER log into a software portal or app**:

36 Ambassador Historians

Zero Login

Working professionals with full-time careers (Bombay High Court lawyers, consultant physicians, corporate executives). They interact exclusively via **WhatsApp interactive buttons** (‘[Accept]’ / ‘[Decline]’). They receive an automated **T – 2 Hours Briefing Sheet** with passenger KYC, dietary flags, and a meeting point Google Map pin.

Transport & Logistics Vendors

WhatsApp & Voice

Jeep drivers (Ramesh Gurav ‘MH 01 DX 4022’) and boat captains (Capt. Dattaram Koli ‘Vessel Sagarika’). Dispatched via automated WhatsApp interactive order with pickup landmark, reporting time, pax count, and contract payout with single-tap confirmation.

Khaki Travel Operating System

24/7 Operations, Tally Accounting, and Before-vs-After Impact

Confidential Briefing

Production Ready

3. 24/7 Operations & Intelligent After-Hours Handling

A major leak in retail and corporate tourism revenue occurs between 8:00 PM and 9:00 AM, and on Sunday evenings. Khaki OS solves this with an **intelligent business-hours policy engine**:

[Inbound Inquiry at 10:45 PM] → System Evaluates Mumbai Local Time (IST)

- 1. Warm Expectation Setting: "Our Mumbai ops desk is resting for the night (Hours: 9 AM - 8 PM IST). We will review your note at 9:00 AM."
- 2. 24/7 Self-Serve Fast-Path: "You can book instantly right now! Browse 60-day calendar & pay via instant UPI QR: khakitours.com/calendar"
- 3. Staff Peace of Mind: Suppresses late-night alarms to Bharat & Priya; queues lead for 9:00 AM sharp priority review.

4. End-of-Day (EOD) Tally Prime Accounting Integration

Khaki Tours uses Tally for company accounting. Khaki OS eliminates manual bookkeeping with a single daily export:

Dual GST Tax Classification

Automated

- **B2C Retail Walks**: SAC 998555 @ 5% Tour Operator Composite Scheme (2.5% CGST + 2.5% SGST, no ITC).
- **Corporate B2B**: SAC 998554 @ 18% Full GST (9% CGST + 9% SGST with client GSTIN captured for ITC claims).

1-Click End-of-Day (EOD) Exports

Tally Ready

- **Tally XML Batch File**: Imports natively into Tally Prime via 'Alt + O -> Import -> Transactions'. Generates Receipt Vouchers, Guide Honorariums ('KT-PAY-G'), and Vendor Logistics ('KT-PAY-V').
- **Day-Book CSV**: Excel audit sheet for accountant verification.

5. Operational Impact: Manual Operations vs. Khaki Travel OS

OPERATIONAL DOMAIN	THE MANUAL WAY (BEFORE)	WITH KHAKI TRAVEL OS (AFTER)
Retail Walk Bookings	Manual Google Sheets updates, texting UPI handles, verifying payment screenshots.	100% Automated Fast-Path : Bot checks seats, generates dynamic UPI QR, decrements seat, delivers pass in <30 seconds.
Corporate B2B Leads	Inquiries sit in inboxes; quotes take 2-3 days; lost corporate retreats.	15-Minute SLA Guard : Real-time VIP scoring, instant alert to Bharat, automated 18% GST proposal builder.
Guide Allocation	Phone calls, last-minute Saturday morning frantic checks.	Zero-Login Broadcast : WhatsApp tap buttons with 30m timeout; automated T-2h briefings with dietary & pacing flags.
After-Hours Inquiries	Queries go unaddressed all night; customers book alternatives.	24/7 Intelligent Desk : Friendly expectation setting + instant self-serve booking link; zero staff sleep disruptions.
Tally Accounting	Manual spreadsheet reconciliation; tedious double-entry.	1-Click EOD XML Sync : Automated journal entries, GST splits, and guide/vendor liabilities posted to Tally Prime.

6. Live Operational Modules Ready for Review

The entire operating system is compiled, tested, and actively running locally on your workstation:

- Internal Cockpit & KPIs: <http://localhost:3001/>
- Live Guide & Vendor Dispatch Board: <http://localhost:3001/dispatch>
- Unified Inbox & 15m Corporate SLA Monitor: <http://localhost:3001/inbox>
- Tour Catalog & Inventory (All 81 Experiences): <http://localhost:3001/tours>
- Finance & Tally Prime EOD Gateway: <http://localhost:3001/finance>
- Automations & n8n Blueprints Hub: <http://localhost:3001/automations>
